

Freight Forwarding Services

Freight forwarding is an essential contributor to the smooth running of international trade. In today's market it is essential that we offer you worldwide logistics solutions that are:

- Economical
- Efficient
- Environmentally conscious

By offering an unrivalled range of freight activities and support services for the importer and exporter, DAP (UK) Ltd has secured a reputation as one of the UK's leading independent logistics companies.

Freight forwarding services

When we provide freight forwarding/logistic services to a customer, we pride ourselves on our communication and customer relations.

We seek to maintain a high quality service which will ensure the safe arrival of your cargo to its destination in the shortest time possible.

Organising freight movements can be time consuming especially with the myriad of suppliers in the market place. For businesses who wish to focus their time on their core activities the additional function of arranging freight can be frustrating and a waste of valuable resources.

Our services include:

- [Trailer and multimodal](#) owneroperator to mainland Europe
- [FCL and LCL ocean freight](#) to worldwide destinations
- [Customs clearance](#) - full import and export documentation facilities
- [Air Freight](#)
- [Rail freight](#)
- Complete [freight management](#) services
- instant [forwarding quote service](#)

Innovative logistics solutions

DAP (UK) Limited has always sought to be different from its competitors.

Ours is a company that prides itself on listening to your requirements and acting upon them. This methodology has helped put us in a strong position within our industry, winning business because we are identified as a company that will go that extra mile to meet and exceed your needs.

Greener logistics solutions

We understand that the environmental issue is very important to you today. Your own customers are demanding more environmentally friendly products and therefore it is vital that we approach the haulage and shipping of your cargoes with sensitivity to the environment.

By its very nature, the transport industry will always have an environmental impact, however our aim is to minimise this.

As a logistics operator this has also resulted in a review of our own procedures and incorporating these changing attitudes into our own organisation.
